

# LET'S MAKE IT A CHEMDRAW DAY

Join us for tips, tricks and techniques  
Thursday, July 14th  
10:00 am – 12:00 pm BST

## Do I need to attend a ChemDraw Day?

- Do you need more than a minute to draw ONE small molecule?
- Do you make copies of molecules using Ctrl + C / Ctrl + V as a shortcut?
- Do you switch to ACS 1996 style settings every time you launch ChemDraw?
- Do you manually adjust the components of your reactions after drawing?

If you answered “Yes” to at least one of those questions, you may not be as efficient with ChemDraw as you think! Join us to see what you didn’t know you could accomplish. We know that you will learn something that will improve your productivity 5-10X.

## Still not convinced? Here’s what chemists had to say about ChemDraw Days:

*“The most informative Lunch/Learn I’ve been to in my professional career. The time savings from this will take hours off presentation preparation.”*

*“Even though I’ve used ChemDraw for decades, I learned shortcuts that will save me hours. The presentation was well worth the time investment. It was terrific!”*

*“Insightful, educational, interesting, and dare I say fun.”*

*“I’ve been a ChemDraw user for 30 years and believed myself to be an expert. Within 1 minute, I’ll say that again, within 1 minute of attending a ChemDraw Day, I realized that I didn’t know much about ChemDraw.”*

## AGENDA AT A GLANCE

Thurs July 14 <sup>th</sup> 2022	DESCRIPTION
10:00 AM	Welcome, Introduction
10:10 AM	What is new and slightly less new in ChemDraw
10:20 AM – 11:30 AM	ChemDraw Day at University of Manchester  Hotkeys Shortcuts around molecules & reactions Smart Copy+Paste 3D Perspective Highlighting and ring coloring Generic Structures Polymers Aligning, grouping, and scaling HELM (for peptides/nucleotides) Drawing cycles Labels, nicknames, templates
11:30 AM – 12:00 PM	Q&A Session
